green media LLP

# THE FIRM

Welcome to Global Green Media LLP, formerly known as Green Media, your premier advertising partner in Kerala, India, established in 2018.

Our production house is fully equipped and has made significant progress in signage, Large Format Prints, Interior Fit-outs, Exhibition & Event Stands, Vehicle Branding, Offset Prints and much more.

Global Green Media is proud to be at the forefront of the advertising and printing industry in Kerala, backed by a team of dedicated professionals with over 15 years of industry experience. Our production area is well-equipped to handle projects of any size, and our skilled team can handle even the most challenging tasks. Our focus is on delivering exceptional customer service. We are committed to our clients and strive to exceed their expectations at every step of the way.

# THE EXPERTISE

## Signage

Signage production is our area of expertise at Global Green Media, and that's what sets us apart. We are passionate about creating signs that leave a lasting impression. Our commitment to quality is unwavering. We create signs with only high-quality raw materials and pay close attention to every detail. Our goal is to provide our clients with top quality signage for their storefronts, and we strive to achieve perfection in our results.

Working with a variety of materials, such as Acrylic, Aluminium, Steel, LED Neon, we bring your vision to life with creativity and precision. Our expertise extends to full metal fabrication for rooftop signs, tower signs, storefront signs, and various other displays. When you choose Green Media for your signage needs, you can be confident that you're partnering with a team that is passionate about creating remarkable signs that elevate your brand's image and leave a memorable impression on your customers.

## Interior Designing

Our business also offers interior design services for commercial purposes. Our interiors are timeless and embody elegance, functionality, and refined luxury for all commercial requirements.

# THE FACILITY

At Green Media, we take pride in our state-of-the-art facility that brings your visions to life. Our large format indoor and outdoor printing machines, lamination, plotter cut, and finishing machines are ready to bring your designs to life. We've invested in the latest tools to ensure that your prints are vibrant, eye-catching, and highest quality.

The SMTJET 3304 is a series of large-format solvent and eco-solvent flex printing machines that can be configured with different industrial pinheads, specifically the Konica Minolta 512i, Konica Minolta 1024i, or Dimatix StarFire 1024 printheads.

#### Key Features and Specifications Models:

The machine comes in several variants, such as SJ18S 3304 and Starfire 3304 Classic, which are often classified by the number and type of print heads used.

**Printheads:** It is compatible with various high-speed, high-resolution printheads:

**Konica 512i:** A widely used head in flex printing for its balance of speed and resolution (up to 1440 dpi).

**Konica 1024i:** Offers higher resolution and improved performance over the 512i.

**StarFire SG-1024:** Known for its industrial durability, repairable design, continuous ink recirculation, and variable drop size (10pl, 25pl, 65pl) for a range of color effects. Max. Printing Width: Typically around 3.2 to 3.3 meters (approx. 10 feet) Max. Print Speed: Can reach speeds of approximately 1200-1500 sq.ft/hr, depending on the number and type of heads installed and the print mode used.

**Ink Type:** Uses solvent or eco-solvent based inks.

**Applications:** Primarily used for large-format printing on flexible media like banners, vinyl sheets, coated paper, and canvas for signage and advertising.

**Manufacturer:** SMTJET, a brand from Hubei SMTJET (derived from Guangzhou Ruizhi), with a production base in China and distribution in various countries.

The MUTOH XpertJet 1682SR Pro 64-inch Eco-Solvent Printer is equipped with staggered dual AccuFine HD printheads that provide ultra-fast print speeds. It's capable of producing smooth gradations while delivering high-quality printing, even with reduced resolutions, thanks to the optional 8-color (CMYKLCmLkOr) ink configuration. Built for Professionals, the XPJ-1682SR Pro is packed with features such as Dropmaster 2 (automatic bi-directional alignments), Feed Master (automatic PF adjustment), Automatic Nozzle Checking Unit option with Nozzle Area Select (continuous printing), i-screen print effects (banding mitigation), and Media Tracker (roll remainder tracking), among other cutting-edge improvements brought on by the original XpertJet line. The XPJ-1682SR Pro includes VerteLith™ Genuine RIP Software, bundled with Flexi DESIGNER MUTOH Edition 21 for the ultimate balance of speed and quality.

The UJV100-160 is a high-speed UV LED inkjet printer mounted with two newly developed print heads to deliver high image quality with max. print resolution of 1200 dpi and max. print speed of 23m<sup>2</sup>/h.\* It is equipped with the DAS (Dot Adjustment System), which automatically adjusts the media setting and various other functions that make it possible to execute a fine and stable output with simple operations, based on more than 15 years of experience and knowledge of Mimaki, an expert in UV printing technology, while focusing on image quality and productivity. Since the LUS-170 UV curable ink for UJV100-160 can be processed without waiting for the drying time, so indoor signs, POPs and stickers can be finished quickly and also suitable for high visibility window displays, decorative transparent acrylic panels, and vivid signage such as light boxes. It can be used with commercially available media like paper and PET film without an ink receiving layer, which helps to reduce the material cost. Furthermore, this ink is VOC-free and environmentally friendly. The UJV100-160 is well-balanced in every aspect of productivity, operability, work efficiency, and environmental friendliness at an affordable price, and will contribute greatly to the expansion of your business

## HP LATEX 700W

Access white and produce the highest value jobs. Extend your portfolio into high-margin stickers and window graphics with the whitest white. Print white without complexity - automatic recirculating and printhead cleaning reduce manual purging.

Deliver vivid colors at high speed, get striking contrast using pure blacks, and expect sharp 4-point text.

Choose from a wide application range covering banners/textiles/poster paper, canvas, wallpaper, and vinyl.

Beat your deadlines with smart, efficient printing. Fast saturated color up to 334 ft /hr outdoor, 226 ft /hr indoor.

Control print operations virtually anytime, anywhere with HP Print OS tools, and grow with HP Learn training. Work fast processing reprints and multi-copy jobs with a smart front panel, and store up to 100 jobs. Enjoy fast and easy spindle-less loading and media access for rolls up to 121 lb (55 kg).

## RODIN CNC ROUTER

A CNC router can be used in the production of many different items, such as door carvings, interior and exterior decorations, wood panels, sign boards, wooden frames, moldings, musical instruments, furniture, and so on. In addition, the CNC router helps in the thermoforming of plastics by automating the trimming process. CNC routers can help ensure part repeatability and sufficient factory output.

## RODIN CNC ROUTER

Acrylic Laser Cutting Machines equipped with CO2 laser technology are widely recognized for their ability to produce smooth, polished edges with high accuracy. Designed particularly for processing transparent, colored, and frosted acrylic sheets, these machines deliver clean cuts and detailed designs without any need for manual finishing.

Whether used in signage production, retail displays, or decorative applications, an acrylic laser cutter machine offers reliable performance, repeatable results, and compatibility with a wide range of design files. From large-format panels to intricate acrylic-made items like aquariums, this laser cutting machine for acrylic ensures consistent, precision-driven output across all acrylic surfaces.

# THE CORE

Our business is built on the mastery of Design, Production, and Installation of Large Format Prints. Whether it's for commercial storefronts, event promotions, or architectural displays, we have the skills and technology to bring your ideas to life on a grand scale.

Regardless of the complexity, our expertise in handling various materials assures the highest quality of your project.
